422 Thunderegg Blvd. Nyssa, OR 97913 (541) 372-3540

Flood-back Permit No. _____ Exhibits _____ Ride No. _____

APPLICATION FOR AND CONSENT TO FLOOD WATER BACK TO DISTRICT CANALS

Flooding waters back to District canal systems without following Water User Policy 3.2B, "Duties of Water Users", is typically disallowed. However, on a limited basis, when it is beneficial or at least not a danger to District infrastructure flood-backs have historically been allowed.

This application to flood-back to District waterways is submitted with the understanding that, if consent thereto is given, it will be subject to the following rules, regulations, and stipulations:

1. A \$150.00 non-refundable fee shall accompany each application to cover handling costs.
2. This permit allows the flood-back to happen outside of the normal water order procedure, but the permit holder still must notify the ditch rider as soon as practicable that flooding back is or will occur thus allow the ditch rider to adjust the canal, if necessary, ensuring it is not overloaded.
3. This approval is based on current canal infrastructure and its operations. If the canal and/or operation thereof changes at a future time this permit shall be revoked.
4. Upon revocation of this permit the permit holder shall install or initiate the use of an overflow or ponding system to control the water that is ordered and return it to the path of historical overflow as it would have happened before the issuance of this permit.
5. The install of said overflow and operation thereof shall be completed and operations commenced within 12 calendar months of the completion of the irrigation season when notice of revocation is given.

The land(s) and headgate below are hereby requested to be a flood-back to a District canal.

Parcel	
Headgate	
Current Path of overflow	
Canal to take flood-back	

I have read and accepted the above rules, regulations, and stipulations.	TO BE COMPLETED BY DISTRICT
